

SBA 3D T-Shirt

SBA 3D T-Shirt™

The SBA 3D T-SHIRT™ is a soft, light weight and comfortable body armour protection product designed to provide the most basic ballistic and knife protection for vital organs such as heart, lungs, liver, kidneys, spleen and spine while maintaining a low profile. Designed primarily for Air Marshals, Special Agents, and V.I.P.s that are on the move, or have to sit in an airplane for prolonged periods of time.

The 3D T-SHIRT™ is constructed of bullet-protection panels with knife and needle protection ability made of 100% Gold Flex® panel inside a tank top of flexible, AKWATEK® moist absorbing 3D mesh covered with the customers choice of a 100 % cotton T-shirt or our Cool Max T-shirt. The 3D T-Shirt™ panels feature Swedish Body Armour's unique 3D Comfort Shield™ technology which is basically a built-in ventilation system that will keep your body cool in warm weather and warm in cool weather - thanks to the wicking action and extreme airflow ability. The tank top holding the panels is adjustable for complete comfort with discrete AKWATEK® & Velcro straps to the back part.

Protection area

Sizes S-L

Front: (W) 39 x (H) 34cm

Back: (W) 42 x (H) 34cm
